## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Tanner (3,163,431).

Tanner discloses a metal seal ring 75 (see Figs. 12 and 13) between first 81 and second 84 flat contact portions. The ring has a rectangular middle base portion 76 with a first protruding convex portion 77 on an inner side of the base to contact the first contact portion 81 and a second protruding convex portion 78 on an outer side of the base to contact the second contact portion 84. The convex portions have a half-circular cross-section. As seen best in Figure 13, the convex portions cause torsional elastic deformation around the center of the base.

### *Conclusion*

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. For example, Warn '662, and Halling '692 also disclose seal rings with protrusions causing torsional deformation around a center of a base.
